

Esker Signs Order Processing Deal Worth \$250,000+ with American-Based Multinational Corporation

The Silicon Valley-based manufacturer will automate 2,000 order documents per month using Esker's SAP-integrated Order Processing solution

Sydney, Australia — December 10, 2014 — Esker, a worldwide leader in document process automation solutions and SAP® software solution and technology partner, today announced that a high-tech, multinational manufacturing corporation headquartered in Silicon Valley has signed on to automate the processing of purchase orders (POs). The company will integrate Esker's on-premises Order Processing automation solution within its existing SAP environment.

Esker was selected after demonstrating how the solution used OCR to electronically and intelligently capture PO data and push the corresponding sales order into SAP for further processing. Esker met virtually all of the company's solution requirements, which included: OCR capability, straight-through processing, automated return material authorisation (RMA), direct lookups in SAP, and exception handling and validation.

The company anticipates significant benefits in two areas of order management. First, by eliminating manual data entry of sales orders, staff will be freed up to devote more time to customers. Secondly, orders will get into the supply chain faster with fewer errors, increasing customer satisfaction and offering greater transparency to orders shipping overseas. The company is also considering the use of Esker's Accounts Receivable solution after recently acquiring another technology company for over \$1 billion.

About Esker

Esker is a worldwide leader in document process automation solutions. Addressing all types of business processes from accounts payable and accounts receivable to order processing and procurement, Esker cloud computing solutions enable companies to automate the reception, processing and sending of any business document with one platform. Esker helps over 80,000 companies across the world to reduce the use of paper and eliminate manual processes while improving their productivity, efficiency and environmental impact.

Esker has global headquarters in Lyon, France, U.S. headquarters in Madison, Wisconsin, and ANZ headquarters in Sydney (since 1997). Over 1,800 companies in Australia and New Zealand rely on Esker solutions to run their businesses.
