Digital Transformation in Purchase 2 Pay

Esker's New Mobile Application Accelerates the P2P Cycle by Enabling Purchase Requisition and Invoice Approval On-the-Go

Sydney, Australia — February 3, 2016 — Esker, a worldwide leader in document process automation solutions and pioneer in cloud computing, today announced the release of Esker Anywhere, a new mobile application that gives managers the ability to review, approve, and reject purchase requisitions and supplier invoices via a mobile device. The free application, available 24x7 on Apple® or Android™ devices, increases the productivity of busy managers and helps businesses further speed up the review and approval of invoices and purchase requests, thus driving greater efficiency in the purchase-to-pay (P2P) cycle.

Esker Anywhere, the new version of Esker's mobile invoice approval application launched in March 2013, delivers purchase requisition approval capabilities in addition to supplier invoice approvals. This new capability is a now a key component of Esker's Purchasing automation solution, which optimises indirect spend requests and goods or services by delivering the mobile convenience to approve such requisitions.

Esker Anywhere provides on-the-road accessibility for managers who approve invoices and purchase requisitions before payment, enabling them to quickly resolve exceptions and approvals, resulting in excellent supplier relationships and increased efficiency in the P2P cycle. Coupled with a fresh new interface design and enhanced usability, Esker Anywhere delivers a more engaging user experience.

The new application allows Esker users to:
- View the list of invoices and purchase requisitions awaiting approval or on hold
- Review invoice images and original supplier quotes as they were received by accounting
- Access invoice or purchase requisition key data (e.g., supplier name, total amount, etc.), as well as comments from requesters and previous approvers
- Review coding and budget information before approving
- Leave a comment for the next person in the workflow or the requester

"Employees are becoming increasingly mobile and require anywhere accessibility to business processes and data in order to maximise productivity," said Jean-Michel Bérard, CEO at Esker. "Our new mobile app is a result of our ongoing commitment to bring value to companies looking for faster and more efficient ways to do daily business activities, including processing invoices and spend requests on the move. As we continue to enrich our mobile offer, Esker will soon include new business processes like sales orders and expand to Windows® operating systems."

About Esker

Esker is a worldwide leader in document process automation solutions. Addressing all types of business processes from accounts payable and accounts receivable to order processing and procurement, Esker cloud computing solutions enable companies to automate the reception, processing and sending of any business document with one platform. Esker helps over 80,000 companies across the world to reduce the use of paper and eliminate manual processes while improving their productivity, efficiency and environmental impact.

Esker has global headquarters in Lyon, France, U.S. headquarters in Madison, Wisconsin, and ANZ headquarters in Sydney (since 1997). Over 1,800 companies in Australia and New Zealand rely on Esker solutions to run their businesses.
